## Key Features

N80 is an industrial rugged GNSS tablet which integrated with high precision GNSS board, high sensitive antenna, 4G network modem, WiFi and dual mode Bluetooth modem, leads the portable high precision tablet in the field of large-size screen mapping.

In the form of the ubiquitous, internet is penetrating and fusion in all corners of surveying technology, and setting off an unprecedented reconstruction and transformation. In the rapidly development information age, data sharing is an inevitable trend, N80 can meet the needs of mapping and GIS industry with the high speed communication modem.

## Application fields

**Land & Agriculture:**  
Land survey, geographic monitoring, cadastral survey, resource management.

**Electricity industry:**  
GIS data collection, powerline safety inspection, facilities maintenance.

**Oil & Gas:**  
Pipe network data collection, safety inspection, precision positioning.

**Transportation:**  
Vehicle management, traffic guidance.
